

Against the Flow

Samuel Brittan has been one of the Financial Times leading columnists for nearly thirty years. He has also advised numerous Chancellors of the Exchequer on economic policy. *Against the Flow* collects the most important of these writings from the last three decades. Brittan has established a reputation for elegance of expression, trenchant analysis and tremendous range of reference. All three qualities are powerfully apparent in this collection, as he ranges over the arms trade and US military (which he opposes); the expansion of free markets and a basic income for all (which he supports), as well as the war on terror. The book also includes his pungent portraits of some heroes and villains, including Keynes, Milton Friedman & Taken together the pieces in *Against the Flow* amount to a robust defence of classic liberalism.
