

## Consciousness Beyond the Body: Evidence and Reflections

Consciousness Beyond the Body presents the latest theories, research, and applications of out-of-body experiences (OBEs) and other consciousness states that transcend the limitations of one's physical body space. It features original chapters from leading international researchers, educators, and practitioners who specialise in OBEs. As a modern compilation on the topic, the book aims to meld contemporary scientific evidence with the latest and most compelling practical applications of OBEs. Contributors: Nelson Abreu, Luis Minero, Ed Kellogg, Ryan Hurd, Robert Peterson, Preston Dennett, Graham Nicholls, Jurgen Ziewe, Clare Johnson, Robert Waggoner, Alexander De Foe, Natasha Tassell-Matamua, and Anthony Peake.
