

Portrait of Aphasia (William Beaumont Hospital Series in Speech and Language Pathology)

Sudden loss of language skills and all power of communication as the result of a stroke or head injury is a catastrophic event to both the patient and their family. There is the initial shock of the illness and the long and frustrating battle for improvement-with disillusionment as the major obstacle to a recovery process that commonly takes years. Portrait of Aphasia is a personal account of the recovery of a stroke victim told with clarity and sensitivity by her husband.
