

Inside the head of a computer geek. A funny little book full of humor and Davisms

You'll all know at least one computer geek, but I'd bet you've never met any like Dave. Meet Dave. Tall and gangly, clumsy and paranoid to the extreme, he has the programming skills to change the world. Welcome to the topsy-turvy world of Dave, where the most mundane activity can turn into a surreal and sometimes cringe-worthy experience. If you ever thought that a trip to the local supermarket or a quiet drink in the evening was safe, then you've never come across Dave. He may be awkward, some might even say insane, but things always work out for him through unforeseeable chains of events and with hilarious consequences. A modern Forrest Gump of technology, Dave's antics will have you laughing all the way through. But more importantly, it will reveal to you what it is really like to be... inside the head of a computer geek.
