

## Hair Care: Physiology to Formulation

Cosmetics & Toiletries, the international magazine of cosmetic technology, is the cosmetic and personal care industry's preferred destination for the latest information on formulations, new technologies, ingredients, testing and news. Its sister publications, Perfumer & Flavorist and Global Cosmetic Industry (GCI), are two of the most respected resources for information in the perfumer and flavorist and cosmetic industries. Pulling from all three magazines most popular articles written by world-renowned experts, Hair Care delivers the same quality and international appeal as the magazines. This compilation of technical articles and formulations is a must-have reference for chemists in the hair care industry. It covers everything the chemist needs to know about hair science and structure. Topics include: Physiology Shampoo and conditioning Ethnic hair care Styling Color Fragrance Sun protection Formulation Testing And more!
