

The Syntax of Nominalizations across Languages and Frameworks (Interface Explorations)

The volume explores the syntax of nominalizations, focusing on deverbal and deadjectival nominalizations, but also discussing the syntax of genitives and the syntax of distinct readings of nominalizations. The volume investigates the morphology-syntax interface as well as the semantics-syntax interface in the domain of nominalizations. The theoretical frameworks include distributed morphology, and minimalist syntax. Data from a variety of languages are taken into consideration, e.g. Hebrew, Bulgarian, Serbian, French, Spanish, German and English.
